

Attorney Docket No. P11006

AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1-3. (Canceled)

4. (Currently Amended) A method of facilitating the tracing of errors in executable software of a computer controlled system, wherein said software is achieved in a building process, i.e. the compiling and linking of a number of source-code files which are stored in a version controlling system, comprising:

compiling said source code files into object files,

linking said object files into a relocatable module, wherein said compiling and linking steps also creates a record specifying names and versions of used source code files,

storing said record in a version controlling system,

retrieving path and version of the record thus stored,

creating a source code file where said path and version number are defined as global variables,

compiling the source code file where said path and version number are defined as global variables, and

after the compiling, linking said relocatable together with said source code file where said path and version number are defined as global variables, into an executable file.

5-6. (Canceled).
